

Dr. Trevor Michael Tomesh

Lecturer

Wilmington University

Email: trevor.m.tomesh@wilmu.edu

Education

Ph.D. in Computer Science

University of Regina, Regina, SK, Canada, 2020

Thesis: "Toward a Theory of Interactive Hardware"

Supervisor: Dr. Daryl Hepting

B.Sc. in Physics, Minor in Mathematics

University of Wisconsin-River Falls, River Falls, WI, 2011

Academic Appointments

Lecturer

Wilmington University (Summer 2024–Present)

■ *Courses Taught:*

- Data Analytics Storytelling (Summer 2024, Spring 2025 – B1 & B2 Sections)
- Python for Data Science (Fall 2024)
- Computer Architecture (Summer 2024)

Assistant Professor (Tenure Track)

University of Wisconsin-River Falls (2022–Present)

■ *Courses Taught:*

- Programming: CIDS 161 (Python), CIDS 162 (Java), CIDS 235 (Programming Paradigms)
- Web Development: CIDS 225 (HTML + CSS), CIDS 325 (JavaScript)
- Other: CIDS 120 (Technology Ethics), CIDS 246 (Introduction to Physical Computing)

- *Teaching Innovations:*

- Revamped CIDS 235 into a broader Programming Paradigms course.
- Condensed two semesters of web development into a single comprehensive course.
- Introduced opt-in AI-assisted grading with a focus on transparency.
- Launched the "Living Textbook Initiative" for adaptive, lecture-based course materials.

Term Lecturer

University of Regina (2021–2022)

- *Courses:* Introduction to Multimedia Systems, Mobile Computing, Risk and Reward in the Information Society, Data Analysis from the Internet

Sessional Lecturer

Lakehead University (2021)

- *Courses:* Mobile Computing, Research Methodology (Graduate)

Sessional Lecturer

University of Regina (2014–2021)

- *Courses:* Programming and Problem Solving, Building Interactive Gadgets, Computer Audio, Intro to Operating Systems, Topics in Data Acquisition and Analysis, Interactive Simulation Methods, Information Theory and Applications, Data Analysis from the Internet

Research

Research Interests

- Large Language Models (LLMs): Applications in education, game development, and technical design.
- AI in Education: Developing AI-assisted grading tools and adaptive learning materials.
- Interactive Systems: Human-computer interaction, simulations, and computing education.

Notable Projects

1. **Living Textbook Initiative** (Ongoing)

- Developed dynamic, adaptive course materials from lecture content.

2. **LLMs and Games** (2024)

- Explored LLM-driven game prototyping with undergraduates.

3. **The Divinity Engine** (Ongoing)

- Created a computational tool for interactive simulations.
